

Benefits of Home Infusion

100% OF IVIG/SCIG THERAPY CAN BE PERFORMED AT HOME

Studies show that home infusion of immune globulin is safe and cost effective. Many patients prefer home infusion because of the convenience and benefits.

88% PATIENTS ELIGIBLE FOR CO-PAY ASSISTANCE

88% of IVIg/SCIG patients qualify for some level of co-pay or financial assistance, funding that offsets cost exposure without coming out of the plan's pocket. CSI Pharmacy's team identifies and secures manufacturer and foundation assistance for eligible patients, working directly with plan sponsors and TPAs to maximize third-party funding and minimize net plan spend.

7 DAYS A WEEK, CONVENIENT APPOINTMENTS AVAILABLE

Time is valuable and schedules can be tricky, home infusion allows patients to receive treatment when it's convenient for them with evening and weekend appointments available. No more missed work, school, or important life events. Pick your appointment time based on your schedule.
